

VIKTOR CSOMOR

Edinburgh, United Kingdom | viktor.csomor@gmail.com | viktorc.net

SUMMARY

Software engineer with hands-on experience and an avid interest in software design, machine learning, and parallel computing. Proficient in Java, C++, and Python. Contributed to the development of complex applications and data pipelines. Fascinated by mathematics, statistics, and theoretical computer science. Passionate about optimal solutions and efficient, maintainable code.

WORK EXPERIENCE

Sep 2018 – present: Software Engineer (Machine Learning), Skyscanner, Edinburgh

Contributed to the development of a large-scale data pipeline and backend application for the collection, aggregation, and evaluation of a specific business metric of strategic importance using distributed computing technologies such as Java Spark and the AWS ecosystem.

Currently working alongside a head data scientist on the development of a complex machine learning pipeline dealing with massive amounts of data for the prediction of flight searches on Skyscanner using PySpark, pandas, and scikit-learn.

Apr 2017 – July 2018: Build and Configuration Engineer, Allianz Technology, Vienna

Developed and maintained plug-ins for an Eclipse IDE to support remote development on a Linux host environment and refactored large portions of the old codebase greatly improving code quality.

Developed both the Java backend and the Angular web frontend prototype of a build report system successfully adopted by developers and build managers company wide.

Implemented a RESTful Java web service backed by a native process pool for the execution of external DB2 stored procedures significantly increasing scalability and reducing response times.

Sep 2016 – Mar 2017: Software Development Intern, Allianz Technology, Vienna

Implemented a secure interactive shell command executor for remote Linux machines, developed Eclipse plug-ins, and provided support and troubleshooting for users of the plug-ins.

PERSONAL PROJECTS

DETROID: A Java chess framework featuring a Universal Chess Interface adapter, a JavaFX GUI, parameter optimization support, and a principal variation search driven chess engine.

C-ATTL3: A C++ header-only template library for deep learning supporting the easy construction and optimization of state-of-the-art neural network architectures such as convolutional ResNets and LSTMs.

PP4J: A Java multiprocessing library providing process pool implementations and a flexible API.

OSML: A Python library of machine learning algorithms ranging from logistic regression and weighted k-nearest neighbours to random forests and naïve Bayes models.

SKILLS

Java: Oracle Certified Java 8 Professional, JNI, JNA, JDBC, JPA, Hibernate, Jersey, Dropwizard, Spark, JUnit, Mockito, JavaFX, SWT, JFace, Maven, Gradle, Eclipse, IntelliJ IDEA

C++: C++11, STL, GCC, Clang, GNU Make, MinGW, Doxygen, Google Test, Eigen, Eclipse CDT

Python: Python 3.x, NumPy, Pandas, PySpark, Requests, Matplotlib, Scikit-learn, Keras, Pytest, PyCharm

Database: SQL, MySQL, Oracle, DB2, Presto

Version control: Git, SVN, GitHub

Others: AWS, Apache Tomcat, Travis CI, Drone, JIRA, Linux, Windows, MacOS, UML

EDUCATION

2014 – 2017: University of Applied Sciences Technikum Vienna - **Business Informatics BSc** – Mobile Computing specialization (GPA: 3.5)

LANGUAGES

English: Full professional proficiency (IELTS Academic: **8.5**)

German: Elementary proficiency

Hungarian: Native proficiency
